

Implement effective project and awards management processes with the Nonprofit Operations Toolkit

Nonprofit Operations Toolkit helps small Nonprofits implement effective project and awards management processes that reduce costs and build trust with funders.

The Microsoft Nonprofit Operations Toolkit provides a functional starting point, that brings together:

- Centralised information management and access using Power Platform and Office 365.
- A common data model with processes specific to Nonprofits.
- Data reliability, to help small Nonprofits build trust with funders.

Key Features
